| Projects   | <b>Sosal Media App</b><br>Developed a full-stack social media app inspired by Instagram with features like posts, likes, comments, and follows. Implemented secure authentication and real-time updates for a seamless experience. Built a responsive UI and integrated REST APIs for efficient data handling. Focused on scalability, performance, and clean architecture.<br><a href="https://sosal-frontend.onrender.com/">https://sosal-frontend.onrender.com/</a><br><b>Full Stack Learning</b><br>Developed a full-stack learning platform with separate <b>Student and Admin panels</b> where students can register/login, explore the website, and participate in interactive quizzes. The admin dashboard allows managing quizzes, updating website content, and controlling platform data dynamically. The system includes secure authentication and RESTful APIs to handle user activities and manage data efficiently across the platform.<br><a href="https://www.fullstacklearning.com/">https://www.fullstacklearning.com/</a><br><b>Pokemon Battle</b><br>Developed an interactive <b>Pokémon Battle Game</b> where users can select Pokémon and simulate battles based on their stats and abilities. Implemented dynamic game logic to compare Pokémon attributes and determine battle outcomes in real time. Designed an engaging UI with interactive components to display Pokémon details and battle results. The project focuses on managing game state, handling user interactions, and creating a smooth battle experience.<br><a href="https://pokemon-f.onrender.com/">https://pokemon-f.onrender.com/</a><br><b>Hangman</b><br>Developed an interactive <b>Hangman Game</b> where players guess animal names by selecting letters. Each wrong guess increases the hangman progress, and after <b>10 incorrect attempts</b> , the player loses the game. The project focuses on implementing game logic and dynamic word updates for an engaging user experience.<br><a href="https://hangman-eight-orpin.vercel.app">https://hangman-eight-orpin.vercel.app</a> |                                                          |                |                                                |                   |
